

Pets

Do you have a pet? Pets are animals that people adopt and take care of. Many people think of a pet as a member of their family. They feed them every day and give them lots of love. Some pets are small, like hamsters, and some pets are big, like horses. Some pets are easy to take care of and some pets are harder to take care of. You can hold some pets, such as cats. Other pets, like a fish, can't be held. No matter what kind of pet you have, it needs to be cared for every day.
